

Cost of living

Task 1:

Tell your partner how much 1 kg (2 loaves) of bread, 1 cup of coffee, 1 glass of beer (0.2l) cost in your country.

Task 2:

Access the following [link](#) and select your partner's country under "Living and Working". Then go to "Living and Working Conditions" and under "Living Conditions" select "Costs of Living". Talk to your partner about things that attract your attention. Which items cost more or less in your country than in your partner's country?

Task 3:

Tell your partner what renting a room in a shared flat or renting a small self-contained flat for one person or one couple costs in your city and compare.

Task 4:

Is it common in your country that students/young people live together in shared flats? How do you live (alone, with a partner or with other people in a shared flat)? If you live together with other people, how do you share the cost?
